**Definition of Risk Management:**

**Risk is the threat that an event or action will adversely affect an organisation’s ability to achieve its objectives and to successfully execute its strategies. Risk Management is the process by which risks are identified, evaluated and controlled. It is a key element of the framework of governance together with community focus, structures and processes, standards of conduct and service delivery arrangements.**

This document has been produced to enable the Town Council to assess the risks that it faces and satisfy that it has taken adequate steps to minimise them. The Council is aware that although some risks can never be eliminated fully, it has in place a strategy that provides a structured, systematic and focussed approach to managing risks which:

- Identifies the key risks facing the Council;
- Identifies what the risk may be;
- Identifies the level of risk;
- Evaluates the management and control of the risk and records findings;
- Reviews, assesses and revises procedures if required.

The exceptions to this are the Personnel Committee and Working Group meetings which have all continued to be via Microsoft Teams to reduce personal contact and infection risk. <b>Council Records</b>	Loss through theft, fire, damage	L	Electronic back-ups of IT records held in the Cloud via Evolve's Data Centre. The Council employs the services of an external IT Support Contractor who oversee all IT management issues including virus protection etc. All paper records are stored securely with Burial Books and Personnel Records kept in lockable filing cabinet/fireproof safe. Historic paper documentation of importance have been transferred to Durham Records Office (and other documentation is continuously assessed for such transfer). The Council Offices are fully alarmed.
